To whom it may concern:

Please don't let Microsoft off the. It has been established that the company is an illegal monopoly that has abused its position in the market. It has been documented that Microsoft failed to comply with an earlier consent decree designed to end its unfair business practices. If Microsoft gets the proverbial slap on the wrist, the software industry and consumers will suffer. A settlement that fails to sufficiently punish Microsoft for its abuses of monopoly power is bad for business and bad for America.
